

PLANTING FOR THE BIRDS

CONIFERS

Douglas Fir
Western Hemlock
Junipers
Pines
Spruce
Yews

DECIDUOUS TREES

Birch Maples
Dogwoods Crabapple
Madrone Hawthorn
Russian Olive Sassafras
Mountain Ash Oaks
Cherry Hickory
Filbert Walnut

SHRUBS

Holly Cotoneaster
Pyracantha Sumac
Viburnums Serviceberry
Lilac Flowering Quince
Weigela Barberry
Blackberry Raspberry
Mulberry Hackberry
Snowberry Elderberry
Oregon Grape Manzanita
Wild Currant Gooseberry
Honeysuckle Buckbrush

VINES

Trumpet Honeysuckle
Virginia Creeper
Scarlet Runner Bean
Morning Glory
Trumpet Vine

GROUND COVERS

Kinnikinnik
Wintergreen
Partridgeberry

PERENNIALS

Aster Garden Phlox
Coreopsis Globe Thistle
Columbine Goldenrod
Bee Balm Foxglove
Cardinal Flower Ornamental Grasses
Bleeding Heart Red Hot Poker
Delphiniums Coral Bells
Sages/Salvias Dianthus
Comfrey Lupine
Penstemons Cornflower
Butterfly Bush Yucca

ANNUALS

Marigolds
Calendula
Cosmos
Sunflowers
Zinnias
Petunias
Salvia
Phlox
Impatiens
Nicotiana
Fushias

Variety is the key to encouraging birds of all kinds. Providing a mixture of large trees, (deciduous and conifer); clumps of berry-laden shrubs; fruit trees; many kinds of flowers and grasses; weeds allowed to go to seed; insects to forage; fresh water; and a well stocked feeder will please a great variety of birds. (P.S. Remember, easy on the chemical sprays.)
